

Dear FCC, my name is Dan Weiss and i am from southwest Fl. XM radio is one of the best inventions in car detailing to come around in a long time in my opinion. the reception is great, it never goes out, and most of all the channels ROCK! where else can you find such a variety of rock, punk, r&b, rap, childrens music, news, sports, and comedy. not to mention country and music from every decade going back to the '40's. don't take xm away because i am just about to get my liscence and i am getting XM in my car.

thanks for reading this,

Dan
